

Tracking products by means of DoP and Identification number.

1

Upon delivery of the product you will be handed a delivery note containing the DoP number, Identification number and CE marking.

ARTICLE
Ytong blocks G4/600
(L x W x H) 600 x 100 x 150 mm
EN 771-4

Intended use 1
DoP-No: 31000031
ID-No: NL044054640008892

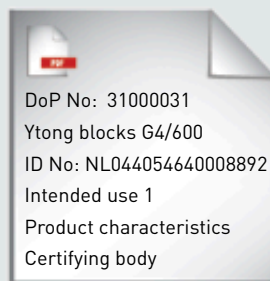

2

The valid accompanying documents can be obtained via www.rad-dop.com.

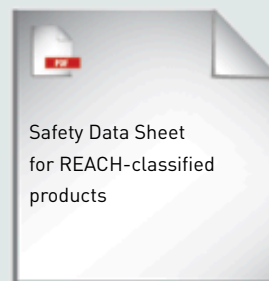

3

The DoP and the Safety Data Sheet (SDS) contain the product specifications and handling instructions.

Explanation

Within the framework of the Construction Products Regulation (CPR), which replaces the Construction Product Regulation Directive (CPD), all products used in construction and falling under a European harmonised standard must have a CE marking. This applies to all Member States of the European Economic Area (EEA). If these products do not have a CE marking, then they may not be traded or applied within the EEA.

The CPR has a direct effect and - unlike the CPD - is not subject to the various interpretations of the Member States. Moreover, the Declaration of Performance (DoP) is a key element.

The CPR requires that the CE marking for construction products is uniquely linked to a so-called Declaration of Performance (DoP) when the products are marketed and distributed. The DoP is either issued to the customer digitally or in print when the product is given the CE marking, or made available by the manufacturer via a website. In the DoP, the manufacturer or importer specifies the performance of the construction product and its intended use in addition to the relevant product and address details. When the product is distributed, the distributors must see to it that the product is accompanied by a DoP.
